YAINEL GARCIA ALFONSO

WEB DESIGNER & DEVELOPER

garcia.yainel@gmail.com • Miami, FL • linkedin.com/in/yainel • github.com/yainel • nanefy.com

PROFILE

Web designer and developer with 10+ years creating digital experiences from first concept to final launch. Designs clean, responsive interfaces with careful attention to typography, hierarchy, spacing, and visual rhythm, then builds them so the design reaches the browser exactly as intended. Skilled at turning complex processes into calm, intuitive experiences for everyday users, and at explaining design decisions clearly to clients and teams. Currently leads the design and development of the consent platform used across a multi-provider surgical practice.

SKILLS

Design: UI design, responsive web design, design systems, typography & layout, grids & hierarchy, wireframing & prototyping, user flows, UX principles

Design Tools: Figma, Adobe XD, Adobe Photoshop

Front-End: HTML5, CSS, Sass, Tailwind CSS, Bootstrap, JavaScript (ES6+), TypeScript, React

CMS & Platforms: WordPress (custom plugin development), Strapi (headless CMS)

Back-End & Integrations: PHP, Laravel 11, Symfony, MySQL, MariaDB, SQL Server, REST APIs, Pipedrive API, JotForm, Zapier, Make

Tooling: Git, Vite, Docker, Composer, Jest, Cypress

PROFESSIONAL EXPERIENCE

IT Specialist / Internal Systems Developer

2025 – Present

Dolls Plastic Surgery LLC | Miami, FL

- Led the UX, interface design, and development of a web application that replaced paper consent forms, creating a calm, step-by-step signing experience for patients and a separate management console for staff; shipped across 16+ releases.
- Designed a two-panel staff interface where the patient list stays in view while details slide in alongside it, keeping staff oriented and reducing clicks during busy clinic days.
- Used procedure illustrations as visual cues so patients can recognize their surgery at a glance, making a stressful moment feel clearer and more reassuring.
- Designed an audit-log view with day, week, and year filters, giving staff a clean, traceable record of every consent signature.
- Built the responsive front end and connected it to the practice's CRM and online form systems through REST APIs, with response caching to keep patient records synchronized in real time.
- Supported 25+ sales representatives across CRM, scheduling, and communication systems, troubleshooting integration failures, account conflicts, and reporting errors.
- Managed user permissions, authentication, and data handling in line with healthcare privacy requirements.

Project Manager

2022 – 2025

Técnica Systems LLC | Miami, FL

- Led implementation, configuration, and customization of sales software for client organizations, tailoring workflows and interfaces to each client's needs.
- Delivered onboarding and structured training for administrators and end users, explaining systems clearly to technical and non-technical audiences and reducing time to adoption.
- Coordinated cross-functional teams through deployment and integration, improving client satisfaction by optimizing workflows and platform usability.
