YAINEL GARCIA ALFONSO

WEB DESIGNER & FULL-STACK DEVELOPER

garcia.yainel@gmail.com • Miami, FL • linkedin.com/in/yainel • github.com/yainel • nanefy.com

PROFILE

Web designer and full-stack developer with 10+ years taking web products from first concept to launch. I design clean, responsive interfaces, build the PHP and Laravel back ends behind them, and connect them to the business systems teams already use. Comfortable owning a project end to end, and at explaining technical decisions clearly to clients and non-technical teams, in English and Spanish.

WHAT I BUILD

Web applications & internal tools — *PHP, Laravel 11, Symfony, MySQL, MariaDB, SQL Server*

- Admin consoles, dashboards, multi-step forms and approval workflows that replace paper and spreadsheets.
- User permissions, authentication, audit logs and careful handling of sensitive data.

API integrations & automation — *REST APIs, Pipedrive API, JotForm, Zapier, Make*

- Connecting CRMs, online forms, scheduling and communication tools so records stay in sync, with caching for speed.
- Diagnosing and fixing integration failures, account conflicts and reporting errors across connected systems.

Websites, e-commerce & booking flows — *WordPress (custom plugins), Strapi (headless CMS), HTML5, CSS, Sass, Tailwind CSS, Bootstrap*

- Responsive marketing sites, online ordering, subscriptions, reservations and class scheduling.
- Content set up so non-technical teams can update their own pages.

Interactive front ends — *JavaScript (ES6+), TypeScript, React, SVG, Vite*

- Data visualizations, drag-and-drop interfaces, search and filtering, motion and scroll effects, performance tuning.

UI/UX & design systems — *Figma, Adobe XD, Adobe Photoshop*

- Wireframes, prototypes and design systems; accessible (WCAG), responsive, bilingual (English/Spanish) interfaces with dark mode.

Tooling — *Git, Docker, Composer, Vite, Jest, Cypress*

SELECTED WORK

nanefy.com — Personal portfolio, designed and coded by hand: 25 live interface demos with their source code, plus five concept projects with case studies (a boutique hotel site, a coffee shop with ordering and subscriptions, a sales and inventory dashboard app, a restaurant with online reservations, and a fitness studio with class booking).

EXPERIENCE

IT Specialist / Internal Systems Developer 2025 – Present

Dolls Plastic Surgery LLC | Miami, FL

Design and build the internal web applications the practice runs on, from UX to production across 16+ releases, integrated with its CRM and form systems through REST APIs. Support 25+ sales representatives across CRM, scheduling and communication systems.

Project Manager 2022 – 2025

Técnica Systems LLC | Miami, FL

Led implementation, configuration and customization of sales software for client organizations, and trained administrators and end users through deployment and adoption.

PHP Developer 2010 – 2020

Freelance

Built and maintained websites and web applications in PHP for clients, handling every project from the first meeting to launch.
